

I am opposed to The Voter Motor Law. My seventeen-year-old son got his driver's license several years before the 2020 election. He planned to vote but could not vote in the primaries because he was registered as an NAV. He was very disappointed. I had told him to get registered and he told me had a voter's card already. I did not realize the DMV automatically registered him as a NAV.

He was extremely disappointed.

I have talked with many people who did not realize their voter affiliation had changed to NAV because they interacted in some way with the DMV.
