

Submitter: Noelle Bell Copley

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB544

Please give the DEQ the directive to create a program for source reduction of single-use plastic food ware and single-use packaging. This disposable society was something people and industry created and we can change to a more sustainable future. I understand this bill's goal is to achieve 25 percent source reductions compared to 2023 levels by 2030, which is only a start, but the state of Oregon should be a leader for the nation.
