

Submitter: Jessica Van Auken

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2994

As a cochlear implant audiologist who serves both the pediatric and adult population, I am in full support of this bill. The authors have done a wonderful job providing background information regarding the problems we see in our profession on a regular basis that reduce access to necessary services, not only for children but for adults as well. The proposal provides very reasonable solutions for improving access to care essential for hearing and communication.
