

Submitter: Amy Farrell

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2458

Conversion therapy is proven to be very harmful, illogical, and any support by members of the scientific community is truly shameful. It also needs to stop being validated as "therapy" as well, because there is nothing beneficial about trying to erase someone's true self. Being LGBTQ+ should be supported & celebrated, and has never been something that needs fixing; not in therapy, not anywhere! Please vote YES on House Bill 2458, and ban Conversion Therapy. Thank you.
