

Submitter: Kathy Cushman

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2994

Insurance companies should fully fund hearing supports (hearing aids, cochlear implants, earmolds, batteries, services, etc.) without loopholes. Children with hearing impairments are at significant risk of developmental delays that can last a lifetime and affect education and eventual employment. Families should not need to fight insurance companies to get the support their children need to develop to their potential.
