

Submitter: Elisabeth Genly

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2617

As a retired nurse-midwife who provided care at OHSU and Tuality Hospitals, I support this bill. Newborn bloodspot screening is meant to be universal; expanding reimbursement to any who pay out of pocket will allow many families to access this important screening who have previously been excluded by cost. I also support the changes to the Advisory Board. Thank you for considering this important bill.
