

Submitter: Diane Chavez

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2215

I oppose removing the requirement that adequate repository for terminal disposition of high-level radioactive waste be licensed as precondition for issuance of site certification for nuclear-fueled thermal power plant, My children and grandchildren live in Oregon. I would like to protect our state for future generations. Nuclear power and the waste it produces is a threat to the entire Northwest and is not a problem I want to leave to future generations to clean up.
