

Submitter: Daria Martin Bigham

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2994

I support HB 2994 for my niece who was diagnosed with significant hearing loss six weeks after birth in 2022.

Kids need new ear molds every time they go up a shoe size which can be as frequent as every 3 months. This bill will fix loopholes, requiring companies to cover services & equipment deemed medically necessary.

I would love nothing more than parents to not be worried about how to pay for new hearing molds

Sincerely,

Daria Martin Bigham
