

Submitter: Chad Harris

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2994

I work for an audiology clinic and, though we do not treat children, it is very apparent that children with hearing loss and their families need this bill to pass. Many do not have the funds to pay privately for hearing aids and hearing related products to help children hearing their best. Children who can't hear well can't learn well. Children who can't learn well, can't be as employable. There should be no barriers for children to get what they need to become positive contributors of our community. This type of bill is an investment in our future. I support this bill and encourage you to as well.
