

Submitter: Michelle Moody

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB3223

I as an assistant would hate to see this industry go down hill. And if this law passes I should get my money back from my education and i should not have to take extra credits to keep my credentials since I pay for this also. It should be a must to take a written test as well as a hands on educational program. Assistants use sharp instruments and chemicals and this should not be just a job for anyone off the street. We take our jobs seriously.
