

Submitter: Timothy Storey

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB542

Please pass this legislation that will require the reasonable ability of consumer electronics to be repaired. We have too much disposable equipment that break for a minor issue and then end up in landfills. Landfills continue to fill up and get shut down, with new ones more difficult to find space for. Anything that can help prevent or delay sending more junk into them.
