

Submitter: Jennifer Sprague

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB544

I strongly support reducing and eventually eliminating single-use plastic foodware, utensils and packaging, because of the permanent trash they create. We survived without them before their invention. We can use reusable products as well as single-use products made from renewable materials that are biodegradable. I support SB 544 and urge the committee members to support it.
