

Submitter: David Pedersen

On Behalf Of:

Committee: House Committee On Education

Measure: HB3014

I fully support this bill as it is critical that society invests in forms of transportation other than automobiles that are clean and efficient. This bill is an essential part of that and the Oregon Legislature should approve it as quickly as possible. I also support its provisions to reduce diesel emissions as those are carcinogenic and especially harmful to the children who ride school buses to and from schools.
