

Submitter: David Klaus

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB551

While I thoroughly believe that safe storage of medication and firearms are an absolute imperative, I am nonetheless concerned about the educational portion of the safe storage of firearms. What assurance can you provide that the education regarding firearms won't be biased? What organizations or entities will you draw statistics and or curriculum from? Will the public be able to preview the curriculum before it's implemented? Unless the aforementioned questions can be answered, I would suggest putting the bill up for amendments.
