

Submitter: Eva Edelman

On Behalf Of: Future Generations

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2215

The mere mining and transport of radioactive materials, operation of nuclear power plants, and creation of nuclear waste steadily undermines health. Radioactive materials accumulate in our environment, our bodies, in all living beings. The gene pool of future generations becomes increasingly compromised. Accelerated by catastrophic accidents... We need to commit to a better path, that actually supports life.
