

Submitter: Lucy Hitchcock

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB488

How has Oregon gotten the reputation with other states of being a place where their toxic waste can be disposed of? How has Oregon allowed Covanta to burn medical waste without following the Federal laws for safe, non-polluting disposal? Why is Oregon allowing our air to be polluted and our people to be medically damaged? Fortunately, now it is public knowledge. Correct the story. Save Oregon's reputation as a state who cares for its people, wherever we live. Pass SB 488. Thank you for all you have begun to do to reduce the burning of fossil fuels. All pollution matters and time is running out.

Rev. Dr. Lucy Hitchcock, Salem, OR
