

Submitter: Felicia Gee

On Behalf Of:

Committee: House Committee On Early Childhood and Human Services

Measure: HB3235

I am writing to express my support for HB 3235. I want to let you know what an additional \$1,200 per child would mean for my family.

This kind of program would really help my family, my 4 year old son and myself, by providing a safety net. An extra \$1200 could pay for a month's rent and almost my full car payment in case of emergency, or help supplement the cost of food since my snap benefits will be cut down to \$74 once the emergency allotments ends next month. Or it could help with a flat tire or emergency car repairs, let us take a fast trip to the beach for my son's birthday or any number of things that help us live a happier life with less financial stress. I'm a single mom and although I've filed for child support I've yet to receive any money from my son's father, I work full time and feel like no matter how hard I try I just can't get ahead and this would help so much.

I support the Oregon Kids' Credit so that my family can get the support it needs.

Sincerely,

Felicia Gee
