

Submitter: Joni Zimmerman

On Behalf Of: Newberg Sustainable Solutions Group

Committee: House Committee On Emergency Management, General  
Government, and Veterans

Measure: HB2601

I personally strongly support this bill and urge you to support it also. As a member of the Newberg Sustainable Solutions Group, I would like you to know that this group also strongly supports this bill. I am a PERS retiree and it alarms me that our investments are still in fossil fuels. I divested my personal investments as soon as I retired, more than 10 years ago! We are in climate emergency because our government at all levels failed to act years ago when information first became available. We must now take urgent strong action. This bill is one tiny step. Thank you.
