

Submitter: Robert Peter Mogielnicki

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB90

I write to support SB 90. Healthy communities depend on multiple sources of economic strength. Single sources of economic strength put private funding sources in control of citizen preferences, frequently running counter to them. When non-sustainable bases of a single economic resource decline, communities collapse. Establishing a task force to study alternative sources of funding for our forest-dependent communities will ensure that our rural communities will have stable funding for local services. In addition it will seek ways to ensure that salmon will thrive and water supply watersheds are healthy and resilient.

Sincerely,

Peter Mogielnicki
