

Submitter: Cindy Fincher

On Behalf Of:

Committee: House Committee On Rules

Measure: HJR20

As a parent, an educator and someone who has worked with families of all demographic and ethnicities this is an extremely bad idea. Young people at this age of 16 are already struggling with mental health issues, navigating changing school systems and this is just another added burden. The way this state has handled Covid has already stripped them of stability and normalcy and now the sponsors of this bill want to add the responsibility of voting. This only seems to serve the legislators themselves and not the youth. Please drop this bill and do something that would support families and in turn would Brin support to teens. Sincerely, Cindy Fincher
