

Submitter: Shauna McKain-Storey

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB546

There are so many personal care products: lotions, makeup, shampoos, hair removers, etc., etc. - and many of them contain chemicals potentially harmful to people's health. Why should I or any consumer have to make sure all of these products are safe - it's impossible! The companies that make them need to certify the safety of what they produce and sell, and our state needs to hold them responsible to do so.
