Committee: House Committee On Climate, Energy, and Environment

Measure: HB2816

I strongly oppose HB 2816! The arbitrary reductions in emission levels and timeline will do nothing but hurt our businesses while doing nothing to affect any meaningful change. Oregon's emissions do not even amount to a drop in the ocean when considering the amount of emissions and pollutants spewed into the air by China and India on a daily basis. Where is the outcry regarding the true culprits? This "feel good" legislation would only hamper our industry and ensure that China and India pollute further with the industry we lose and they gain.
