

Submitter: Mark Slezak

On Behalf Of:

Committee: House Committee On Economic Development and Small Business

Measure: HB2199

- JSR Micro, Inc. supports the Enterprise Zone Program sunset date extension.
- This program was an important part of the overall site selection process for our Hillsboro factory location.
- The five-year capital expenditure offsets allows for faster ramping of the site to high volume manufacturing.
- The existence of the EZP, and the flexibility to make multiple applications, helps the business justification for future expansion in Oregon compared to other locations.
- This program helped pave the way for our initial investment in the Hillsboro area, and will continue to be an advantage and incentive for future expansion.
