Measure: HB3206

HB 3206 HOUSE COMMITTEE ON RULES

Opposed to lowering the age to vote in a primary election to 16 and/or 17 years of age, if registered to vote, in elections pertaining to the school district in which person under the age of 18 resides.

The human brain does not mature until age 25+ years of age, although the legislature for unknown reasons is bent to believe that voting age should be changed throughout the spectrum of age qualifications to vote, currently at age of 18.
