

Submitter: Eric Simpson
On Behalf Of: Human Being Taxpayer
Committee: Senate Committee On Education
Measure: SB551

Human Beings do not need the Governments assistance regarding storage of anything we have been prescribed by a Doctor or have purchased legally. Certainly NOT medication or firearms! However, if our Government insists upon becoming a parental figure and providing '...SPECIFIED INFORMATION...' then the very least this Government should in any way undertake such a personal endeavor would be to Require people with Professional Knowledge (and to PROVE that they do), provide this Specified Information. As this, this...'Bill' now reads, It is Absolutely Incomplete and should be completely rewritten. SB 551, as it is currently written, needs to be voted OUT immediately. Why do Doctors and Pharmacists attend years of study to Obtain a License to Practice? Well, there is already an Abundance of Information with ALL medications so why spend our Limited Tax Revenue on that one? Same with Firearms purchased Legally.
