

Submitter: Diane Hodiak
On Behalf Of: 350 Deschutes
Committee: House Committee On Climate, Energy, and Environment
Measure: HB3166

Please support HB 3166.

Today, homeowners and building owners are often at a loss for learning about all the incentives for electrification. We must make it easier for them and this bill accomplishes that. I am the executive director of 350 Deschutes which represents about 2000 stakeholders in Central Oregon. We note that our rural communities often need assistance with learning about electrification resources, and although there are many nonprofits that help, the information still falls through the cracks. A one stop shop would address this.

Oregon's goals for emission reduction inherent in nearly all agency rules, will also benefit.

Thank you for the opportunity to testify and to our representatives that have brought this bill forward.
