

Submitter: Marilyn Vigoren

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB795

The State has done a terrible job managing our forest lands, each county knows what is best for their individual need's including protecting our forests. What might be good for Columbia County would not necessarily be good for Deschutes County; as Columbia gets more rain and their trees have a deeper root base where Deschutes County trees have shallow roots base with little rain.
