

Submitter: Judith Mosteller

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB795

I support SB795 because the counties have a direct interest in their communities. The state has not done a very good job managing our beautiful forests over the past number of years. Our forests need to be managed well to provide income for our forestry communities and businesses. When more logging was done, the forests were in better shape and roads were more easily accessible in case there was ever a fire. The forests were kept much cleaner with less "fuel" on the ground to burn. I urge you to support this SB795.

Respectfully,

Judi Mosteller
