

Submitter: NW Coast Range

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2816

HB 2816 HOUSE COMMITTEE ON CLIMATE, ENERGY, AND ENVIRONMENT

All too self-evident that the Legislature does not listen to Oregon citizens, wouldn't the legislatures time be better spent doing a statewide assessment of every business Oregon regulates before the House and Senate decide to point a finger at one particular industry.

The cruxes of the entire greenwashing agenda that Governor Brown and then Speaker Kotek drilled into your brains are mistaken rhetoric to attack one institution, business, or person, one right after another. Regulations must pertain to all persons and all person corporations.

Has the legislature considered that the scientific data sometimes provided is unbalanced and regulation ignores facts or purposely minimizes pollution standards to encourage economic bragging rights for the state and the wealthy? Instead of supporting the citizens of this state, the legislature deems that Bills should attack industries in which the citizens purchase energy. Then, hard working citizens' get the shaft in higher costs.

Fed up with political institutions, which deem there are two sets of rules and justice in America. Just as American citizens did not succumb to the tyranny of the King of England, the sovereign American citizens' are not about to become serfs to the tyranny of the state or federal government.
