

Submitter: NW Coast Range

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB3056

Furthering the all electric appliance legislative scheme on a continuing basis?

Does the legislature have that much confidence in an electrical grid that was built and scabbed together since the 1889?

Or does the legislature intend for citizens be overly dependent on the electrical grid, electrifying all means of heating, cooling, and driving.... Then poof one day or another, the energy conglomerates will say, "today you cannot charge your car, you are ordered to decrease your thermostat in winter, and raise your thermostat in summer. Or better yet since your household was ignorant enough to fall for the smart thermostat to supposedly save energy, we'll just adjust your thermostat remotely through your household wi-fi, hotspot, or data connection.
