

Submitter: Andres Marin-Hardy
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB422

Hi, my name is Andres I'm a motorcycle rider and I think passing this bill would be a major net positive for the city. I think decreasing the amount of cars on the road and decreasing carbon emissions is 2 of the biggest reasons why I would support this while also helping alleviate traffic on major highways. I currently drive to work from Beaverton to the Airport where daily I encounter traffic at some point along my route. Whether it be the tunnels on US 26, the traffic on I-84, or even the back up on I-205. If not one of those it's all of them most of the time. Countless times I've thought when sitting in traffic letting my car idle that I could be one less car on the road and get to work quicker all if I was on my motorcycle able to lane split. And with current public transit methods taking well over an hour and a half spending 3 hours of my day on MAX is not an efficient use of my time. I really hope you take my comments and many others alike seriously and pass the bill.
