

Submitter: Katherine Moore

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2697

As an ICU nurse, I need hospitals to develop and support nursing staffing committees to ensure safe staffing for our patients. Safe staffing helps to maintain competent and confident nursing decisions without delay in care. Safe staffing and hospital support of nursing committees is very important to me. Without hospital support and respect for their nurses, my future career in nursing would be in jeopardy.
