

Submitter: Sarah Mann

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2697

Safe staffing has been overlooked by the Healthcare system. Working short staffed places patients as well as staff in harms way. With no oversight short staffing has become a regular occurrence with more demands being placed on staff and less care being able to be provided to patients due to the increased workload and lack of staffing. We need technical staff and service staff staffing committee's to help with this increased workload and as a way for there to be oversight on short staffing and how quality of care is affected based on staffing.
