

Submitter: Michael Wagner

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure: SB422

Lane filtering saves lives and reduces road congestion. Lane filtering allows riders of motorcycles to avoid many dangerous and risky situations. Motorcycle riders have no choice but to stay boxed in between cars with no easily accessible escape route when filtering is illegal. Motorcyclists are constantly at risk of being rear ended by unaware drivers at stop lights and during severe highway traffic.

There are hundreds of hours of videos coming from California of riders escaping serious injury and crashes via lane filtering.

Save people's lives and reduce the burden on taxpayers and the health care system. We have too many motorcycle involved accidents already.
