

Submitter: Kris Hurre
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB422

I am a motorcycle rider both for pleasure and regular commuting. I support SB 422 as there are also many models of motorcycles that are air cooled and will rapidly overheat when sitting still without airflow. If applied in the correct way and under only certain circumstances, it has been shown to decrease the danger to motorcycle riders, reduce congestion on busy highways, and reduce emissions that are spent when idling.

Please support my safety both when riding for pleasure and commuting by voting in favor of SB 422.

Thank you,
