

Submitter: David Gould

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB795

The Forest Lands that the counties gave the State Forest to manage must be returned to the counties so they can collect the most revenue for their county. The Habitat Conservation Plan as written is bias for the endangered species and was drafted by individuals with no concern for the county financial obligation to their tax payers. They should be managed to hstvest timber not grow it to burn.
