

Submitter: carla cole

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB795

These are public state lands that should be managed by the state, for the benefit of all Oregonians, and in a balanced manner that will ensure protection of the environment along with sustainable timber harvest. I am strongly opposed to conveying these lands to counties, who have demonstrated that many of them wish to manage these public state lands for maximum harvest and profit, NOT for the greatest permanent value for all Oregonians.
