

Submitter: Darcy Olson  
On Behalf Of:  
Committee: Senate Committee On Judiciary  
Measure: SB422

To whom it may concern,I have been avid motorcyclist for 40+yrs,and a professional truck driver for 20+yrs.I spend a lot of time on the road,including states where "Lane shareing,"in one form or another,exit&have for years.When education is administered along with new legislation,the transition to safer,smoother traffic flow should be an easy one,and quite frankly a logical choice that is overdue.As we experience heavier traffic every year,I feel the sooner this is integrated the better.I follow the rules of the road,and would welcome the ability to filter traffic when situations dictate it be safer.Getting from point A to point B quicker,for everyone,obviously is beneficial to all,bit the biggest selling point for me would be safety.I am part of traffic far more than "Normal"commuter(2,500mi a wk in truck alone)and would welcome proposed legislation.Thank you for any and all considerations.
