

Submitter: CIAN GIPSON

On Behalf Of: Self

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2697

Hospital staff have been overworked and understaffed since the start of the pandemic. To prevent further staff burn out and maintain quality care we need properly staffed health care facilities. The increased demand on our healthcare system is not going to disappear and we must support those that have chosen to support us in our time of need. Pass this bill!
