

Submitter: Alison Dennis

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2697

As the covid pandemic continues and we face massive turnover of nurses and other medical workers due to overwork and stressful work environments, it is of the utmost importance to support this push for safe staff to patient ratios in hospitals. I stand in solidarity with the hospital workers fighting for better working conditions and I stand with all Oregonians who deserve safer hospitals. Please vote yes on this important bill!
