

Submitter: Kristen Sartor

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2697

Committee members,

It is incredibly important that we have safe nurse-to-patient ratios. Nurses cannot provide adequate care for patients if there are not safe nurse-to-patient ratios. Additionally, overworking nurses contributes to high burnout rates and turnover. This is not in the best interest of patients, nurses or quality care. Please support our nurses and our patients and pass this bill.

Thank you,
Kristen Sartor
