

Submitter: Jeremy Salmon

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2697

I support this measure as the previous three years (and long before that, really) have explicitly demonstrated the need for staffing support. Better staffing strengthens the system that's overloaded and in dire need of support of the workers, staffers, and nurses. Also, we have the stats showing the improved health outcomes from the better staffing levels.

Sincerely,

Jeremy Salmon
