

Submitter: Trevor Derrick

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2697

Unsafe staffing ratios put our community at risk and drastically lower the quality of Health care we can provide. It has taken me personally over three months to gain access to mental health services due to the lack of staffing. Corporate greed and the lack of engagement by the large Health care organizations at the corporate level is allowing this to happen in our great state. Please support this bill for the safety of our children and families.

Thank You,

Trevor A. Derrick, CST
