

Submitter: Reed Shumway

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure: SB422

I support this bill. Sitting in traffic when it's hot on a motorcycle, you get the heat from the sun, surrounding cars and the asphalt which can be a health hazard leading to heat exhaustion or even a heat stroke. breathing the fumes from exhaust is also a danger. Being able to split lanes eliminates this problem. Riding a motorcycle reduces stress to the road, frees up space for cars and lets traffic flow smoother.
