

Submitter: Mortuma Murry

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2927

As a family member of a person with severe sickle cell disease and an individual with sickle cell trait I have always desired a stronger community of individuals to exist for the purpose of guiding and directing knowledge, education, research, and guidelines for this minority population that has historically been neglected. This bill would be the cornerstone to these efforts in Oregon, and the surrounding area. As a member of the sickle cell community, and a medical provider caring for patients with sickle disease I fully support and believe there is a need for the things outlined in this bill.

Respectfully,

Dr. Murry, a provider, member of the sickle cell community, and advocate.
