

Submitter: Spencer Allard

On Behalf
Of:

Committee: House Committee On Agriculture, Land Use, Natural Resources, and
Water

Measure: HB3159

Wolves are crucial for our environment because they help control over population the Mexican Wolves are no exception if we let them because endangered it would have a massive effect that would be negative not only to the environment but to the peoples hearts who care about Wolves if the United States continues to kill and not support Wolves were it is needed like Montana then we the people will gather support and we will be dedicated to draw out large crowds and protest peacefully every day or night
