

Submitter: Kelly Anderson

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2927

To Whom It May Concern,

I am a Nurse Practitioner working at Doernbecher Children's Hospital, who has been caring for children with hematologic diseases for the past 30 years. I have seen firsthand the devastation of this chronic illness on young people and their families. I have witnessed long term disability and early death. I am in favor of legislation that supports this population and improves outcomes of physical, emotional, financial and social health.

Sincerely,
Kelly Anderson
