

Submitter: Salvador Magallon

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2697

As a medical professional who has worked in three states over the last two decades I have seen the precipitous decline of staffing levels at the expense of patient and employee safety. The quality of care had also declined in contrast to the wealth produced by our labor. We've been increasingly doing more with less at the will of hospital administrators and we have reached our breaking point. I've never seen a crisis this bad. Morale everywhere is at it's lowest. We're fed up. As our leaders we are relying on you to help us fix this issue. Thank you.
