Senate Committee on Energy and Environment

Re: Senate Bill 803

Dear Chair Senator Sollman, Vice-Chair Senator Findley, and members of the Committee;

The further down this road we get the farther away from the issue of carbon dioxide it becomes. This bill talks about “carbon dioxide *equivalents*.” From the beginning this issue has been less about our environment and more about who pays and who gets paid.

*“What historians will definitely wonder about in future centuries is how deeply flawed logic, obscured by shrewd and unrelenting propaganda, actually enabled a coalition of powerful special interests to convince nearly everyone in the world that carbon dioxide from human industry was a dangerous, planet-destroying toxin. “It will be remembered as the greatest mass delusion in the history of the world—that carbon dioxide, the life of plants, was considered for a time to be a deadly poison.”*

— Richard Lindzen

It would behoove the Committee to look up who Richard Lindzen is.

I urge the Committee to table this legislation.

Sincerely,

A handwritten signature in blue ink that reads "Richard Wisner". The signature is written in a cursive, flowing style.
