

Submitter: Bryan Murphy

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB803

This would be the end of our existence as a moving and delivery company in Oregon after nearly 30 years. It would cripple moving and storage in Oregon and no company would have the ability to perform any services and would be forced to shut down. My 40 employees that depend on this job would be forced into the unemployment lines and we would shut our doors. This is the silliest proposal from our state yet seen. It has been hard enough to make it through all the sanctions, taxes, permitting, and overreaching laws. I have done nothing but move people out in record numbers due to our backwards government. Individuals and entire companies as well, overwhelmingly agree that the politics of this state are the reason they are leaving. If this goes through, it will break the tax base of the state and shut down 100's of businesses. Unless Oregon is willing to trade out new EV tractors and bobtail trucks for my diesel powered trucks, this proposition would be the end of this state and its economy!
